

Deloitte.

eDiscovery

The past, present and the future

Jason Weir and Mel Maddox, ILANZ Conference, 25 May 2017

Top five Discovery risks

1. Lack of critical thought around data collection
2. Underestimating complexity
3. Agreeing keywords before testing
4. Inconsistent coding
5. Not complying with High Court Rules

Three key questions to take away

1. If you received a Discovery Order or Regulatory Notice or were involved in an investigation, how would you respond?

2. In terms of your organisation:
 - Where is the data stored?
 - How quickly can you collect the data?
 - Do you legally have the right to collect the data?

3. How could technology assist to make your next review more efficient and robust?
